PRESS RELEASE

Ministry of Foreign Affairs participated in the world copper conference in Lima

During her participation in Expocobre 2023, the General Director of Economic Promotion of the Ministry of Foreign Affairs highlighted the growing importance of copper within our mining production and the high significance of this mineral within the global energy transition process that is underway.

The General Director of Economic Promotion of the Ministry of Foreign Affairs, Minister SDR Noela Pantoja, participated in the Expocobre 2023: I World Copper Conference + Expo, held from May 29 to June 1 at the Jockey Exhibition Center in Lima.

The four-day event brought together thousands of national and international participants from mining companies; equipment, technology and service suppliers; government and academic entities; governmental and academic entities; and investors in general. Its objective was to generate positive encounters between the different actors committed to the sustainable development of mining in the region, with a view to highlighting its importance in the national economy and to promote a modern, safe and responsible activity.

During her participation, the Director General of Economic Promotion of the Ministry of Foreign Affairs highlighted the favorable economic outlook of our country, whose stability reaffirms it as a reliable partner to attract and receive foreign investors.

She assured that private investment has been an indispensable component to continue with the national economic reactivation.

In another moment, he referred to the fundamental role played by formal and responsible mining in the national economy.

In this regard, he highlighted the growing importance of copper in our mining production and the high significance of copper in the national economy. production and the high significance of this mineral in the global energy transition process that is currently underway.

In this sense, the diplomatic official reaffirmed the firm commitment of the Foreign Ministry to contribute to the development of the national mining industry, with permanent actions that seek to attract responsible foreign investment through our network of missions abroad.
